Step 1: Create New Design

Choose to create a new design with or without Beta.

Note: Either option will be adequate to complete the assignment. The Beta version has some improvements.

Step 2: Name Your Project

Select the default title in the word bar and rename your project.

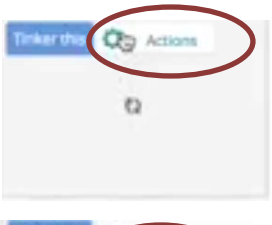

Step 3: Return to Your Designs

Select the Tinkercad logo to return to your designs.

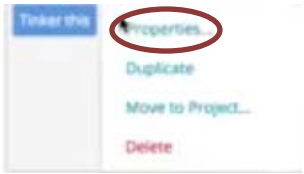

Step 4: Make Your Project Public

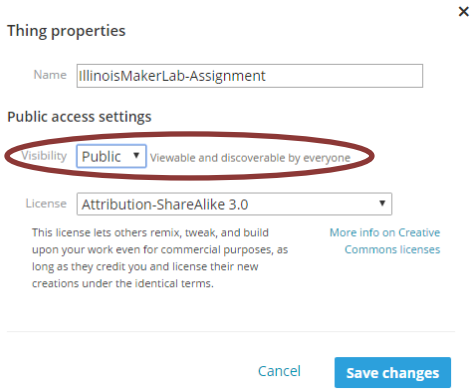

Hover the mouse over your project and select the **"actions"** icon.

Select the **Properties** Option

Change the **visibility** from private to public.

Step 5: Share Project Link

Click on your project's thumbnail.

Copy and paste your projects Link in to the module's assignment.
